

The current unrest and the shocking Human Rights Violations in Ethiopia

The current unrest and the shocking Human Rights Violations in Ethiopia by the illegitimate TPLF (Ethiopian Government?) is a despicable and inhuman action. The suffering of the Ethiopian people under the lawless minority group has continued without the intervention of the International Community for the last 25 years and reached at alarming stage. The unlawful annexations of the vast fertile Amhara State land by TPLF have been continued and conflicts are active in Hummer, Tsegede and wolkait areas.

The invasion of the Amhara eras, the forced removal of the indigenous people and the settlement of people from Tigre into the Amhara and other fertile lands is one of the main causes of misery in Ethiopia. Amhara farmers have been removed from their ancestral land and replaced by People from Tigre. The new settlers include armed TPLF militias are evicting farmers from their villages by intimidation, raping their wives, children and by destroying their cultural heritages and livelihoods.

At the end of November (2015) a prison that has contained thousands Amharas has been set on fire and many prisoners were burnt inside the prison. Many others were mercilessly shot down by TPLF Militia and Security forces while they were trying to escape from burning. This is how TPLF is running the 100 Million people of Ethiopia! Many innocent elderly, women and children have been massacred during the indiscriminate manslaughter in the street of Gondar.

TPLF has also purposely instigated ethnic conflicts between the Amharas and the minority Qimant people. By encouraging mistrust and hatred on both sides of the brotherly people TPLF managed to sustain the conflict and bloodshed in the area.

while this is in progress in the Amhara areas TPLF expanded its evil operations in Oromo areas by carefully orchestrating protests against the regime. The purpose of this vague operation showed

that it has a hidden agenda against the Amharas who are living peacefully in Oromo areas. According to reliable sources many Amharas are being killed, houses are burned, crops and livestock are looted. However, because of the collaboration between the Amharas and the Oromos the extent of damage has been diminished. Many believe that TPLF is preparing to instigate a full scale conflict between the two largest brotherly Ethnic groups for its evil survival.

The protest against the land grab from the poor farmers has been suppressed by TPLF's excessive force and many students and peaceful people were massacred cold bloodily by TPLF security forces in Oromo area. To confuse the public and to divide the two largest Ethnic groups TPLF continued its divisive propaganda and evil crimes against the Amhara and Oromo people.

Currently the Amharas are under attack by TPLF instigated and supported campaigns from every direction of Ethiopia. It is very important to all countries that support the illegitimate and minority TPLF to consider their relationship and to align with the majority people of Ethiopia. The sooner the better!

The systematic orchestration continued by the TPLF controlled state media. The Oromos are encouraged to kill the Amharas so that the question of democracy and Human Rights are forgotten. This is carefully planned by the evil TPLF to turn the people of Oromo against their brothers (Amharas), to instigate a full scale war between the Oromos and the Amharas.

It is the responsibility of all Ethiopians especially the responsibility of the Amharas and Oromos to stay united and fight against TPLF. We also ask the International Community, Human Rights groups and all Ethiopian opposition organisations to work together and foil the evil plans of the criminal TPLF.

May God Bless the innocent people of Ethiopia!

Kalemu
